I am a third-year Computer Engineering student at the University of Chile seeking a **Professional Internship I (180 hours)** where I can apply my knowledge in **Front-end** or **Back-end**. I currently have **projects** made in **React** and **Python**.

Part of my progress includes taking courses in Software Engineering and Web Application Development to gain knowledge and tools that allow me to apply my skills to real projects

## Knowledge & Skills

**Front-end:** React, Typescript, Javascript, Tailwind, CSS, HTML

**Back-end:** Python: Django and Flask, Node.JS, MySQL, SQLite, and PostgreSQL

**Tools:** Figma (Design) Git (Version Control)

**Languages:** Spanish (Native), English (B2, TOEFL in process)

## Education

University of Chile

SANTIAGO, CHILE

**Computer Engineering Student (Third year)**

Related courses: Software Engineering, Web Application Development, Databases

**Computer Engineering**

2022 – 2027

## Projects

- **DCCPlaces** **Technologies:** Django, Tailwind CSS, HTML  
Team development of a web application for space reservations within the Computer Science Department. I mainly contributed to Backend functionality using Django.
- **Rust Testing Zones** **Technologies:** React, Typescript, Rust playground API  
Creation of a website to familiarize users with the Rust programming language syntax, with basic examples and the ability to write and execute code in real-time.
- **FCFM Curricula - fgonzalezurriola** **Technologies:** React, Typescript, Tailwind CSS  
Implementation of a platform to manage and visualize the curricular structure of courses in a university, with an interactive interface and administrative functions through CRUD. You can find the link to this project in my portfolio.
